

Independent Coder Declaration

Inter-rater reliability — repository-mining study

Manuscript: "Oracle Observability of Quantum Transpiler Regressions: What Output-Equivalence Oracles Miss — A Cross-SDK Mining Study and a Fault-Class-Matched Oracle Family for the Output-Invisible Channels (Qiskit, tket, Cirq)."

This form records an independent coding contribution to the study, for research-integrity and inter-rater-reliability reporting. Please complete every field truthfully and sign. If any statement is not accurate as written, edit it so that it is.

1. Coder

Full name: Muhammad Sajjad Saleem

Role / highest qualification: MS Data Science

Affiliation: Thal University Bhakkar, Lecturer

Relationship to the study: External Volunteer

Prior quantum-computing expertise: Freelance Software Engineer

2. What you coded

Tick each corpus you independently categorised against the frozen codebook (CODEBOOK_v2_FROZEN.md):

[Y] 24-fix Qiskit adjudicated seed

[Y] 44-fix Qiskit expansion

[N] tket cross-SDK set

[N] Cirq cross-SDK set

3. Independence and blinding

Please confirm (edit if not accurate):

"I categorised each bug-fix on my own, using only the linked bug-fix material (title, description, linked issue, diff) and the written codebook. Before I finished my coding I did NOT see (a) the other coder's labels, or (b) any AI- or LLM-generated labels."

Confirmed as written? (Yes / No — if No, describe what actually happened):

Yes

4. Dates

Date(s) my coding pass(es) were completed: July 5, 2026

5. Original worksheet(s)

My raw, pre-adjudication labels are those recorded in the following file(s), and they have not been altered since I submitted them:

Worksheet file name: rater3_sheet.csv

Signature

Signed: Sajjad Saleem Date: July 25, 2026
